

Bending machine model ZGR 1400/1,2

Standard Equipment Included:

- Rear frame supporting the metal sheet (detachable).
- Front bumpers designed for efficient serial cutting of sheet metal.
- Protractor allows accurate sheet metal bending.
- Bending angle limiter with a wide setting range, guarantees repeatability with serial sheet bending.

Technical Specifications

Munka hossz	1400 mm
Maximális lemez vastagság:	
- Acél lemez (do 400 N / mm ²)	1,2 mm
- Alumínium lemez	1,5 mm
Hajtó lista szélessége	15 mm
Maximális hajtott szög	0 ° - 145 ° - 180°
Felső lista nyitása	70 mm
Méreték:Hossza/ Szélessége/ Magassága (mm)	1680/ 910/ 1000
Súly	130 kg

Advantages of the machine:

- The bending machine is ideal for workshops as well as for use on roofing.
- The mobility of the machine is ensured by its small dimensions and weight.
- An additional advantage is the narrow bending beam of only 15mm.
- The structure made entirely of steel guarantees stable operation and trouble-free bending.
- Pressure and bending beam made of solid material in one run, which ensures appropriate quality and accuracy in the work of the folding machine.
- All components are made by us on CNC numerical machines, which translates into a long life of the bending machine.
